President of the National Black Caucus of Local Elected Officials

Purpose

As elected officials we are called to represent, our constituents in getting their needs met. Often times, the issues concerning our constituents are similar, whether they are African American or Non African-American. In certain broad categories, constituent issues in Hopkinsville are not very different from those in Louisville, Lexington or Pikeville as they relate to African Americans. After much discussion with our constituents and KBC-LEO Board members, we have agreed on the following critical areas that need attention — not only for African Americans, but Kentuckians at large. Those areas are:

- Stimulus Dollars
- Education
- Justice
- Healthcare
- Economic Development

As you know, there are other factors impacting these areas when experienced through the eyes of the average African-American Kentuckian.

Many times, our effectiveness in getting our voice heard is directly related to the number of us speaking. There is a great need for all of us as elected officials to come together to strengthen our voice and partner to solve some of the issues plaguing our communities. This meeting is designed to bring us together on the issues that unite us, create dialog and organize our efforts to create positive change on the issues. The expected outcome is to have a united, clear, cohesive message/agenda.
